DEPARTMENT OF STATISTICS AND ACTUARIAL SCIENCE
THE UNIVERSITY OF HONG KONG

Seminar

Dr. CHANG Ching-Meei

Vice President & Actuary at Prudential, U.S.A.

will give a talk

entitled

The Actuarial Profession
Examples of Stochastic Modeling Applications

Abstract

I would like to share my 20 years of experience in the actuarial profession with students to give them a better prospective about this profession and to help them consider if this profession is the right choice for them. To do this, I will use the kind of work I have done in different stages of my actuarial career to show how the challenges and the level of responsibilities that have broadened. I will then focus on two applications of stochastic modeling: one on capital management on universal life with no lapse guarantee feature, and another on a company wide economic capital project. The purpose of presenting these two applications is to show in depth how the complicated actuarial model can be used to provide solutions to real life problems.
